

How To Guide: PAINTBRUSH SOAP

STEPS:

1. Rinse paintbrush with clear running water to remove excess paint from brush.
2. Swirl brush in Paintbrush Soap.
3. Work soap into bristles with fingers.
4. Rinse. Repeat if needed.
5. Allow soap cake to dry before replacing lid on container. This prevents the soap cake from becoming soggy.
6. Store below 95° degrees F to prevent the oils in the soap from liquefying.
